About 3-Foot Sections

When investing in new product development, Unico values and considers input from our Unico Preferred Contractor's (UPC) and customer base. It is this collaborative entrepreneurial spirit that is the foundation of the addition of the 3-Foot section offering to our Twist-Fit product line.

Research has shown having 3-foot sections of Twist-Fit allows the contractor to have flexibility in configuring the supply tubing regardless of the project type. The 3-foot sections can easily be coupled together to make longer supply line runs allowing a custom fit for every project.

At Unico we understand all projects and installations are unique and for this reason we developed different packaging alternatives to meet your various installation needs. As a contractor you can purchase a single 3-foot section, or you can purchase a 6-pack of the 3-foot sections.

About Kits

We have redesigned our Twist-Fit Installation kits to provide all the items you need that are perfect for working with our 3-foot sections of the Twist-Fit product line. These installation kits include the supply outlets, take-offs, couplings and more!
