

# Filters

## Features and Benefits

- 100% synthetic media resists moisture, mold, and damage
- Maintains MERV 13 performance in a full ASHRAE 52.2-2012 testing
- Two-piece die-cut frame bonded to each other provide double-wall thickness
- Water repellent adhesive used to bond frame with media pack
- 100% water repellent, high-strength adhesive coats interior of frame

## System Advantages

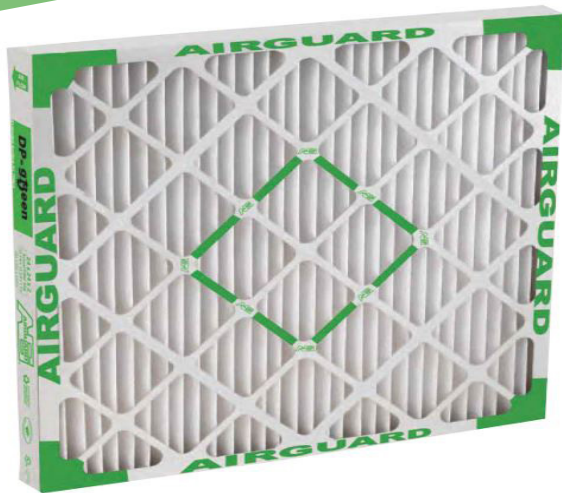

- Durable, moisture-resistant, 100% synthetic media
- Low pressure drop and high dust loading
- Qualifies for LEED certification
- Made in the U.S.A.

## About Unico

Since its inception in 1985, Unico, Inc. has dedicated itself to the production of quality products for the indoor comfort market. This dedication has made Unico a leading innovator in superior heating and air conditioning products and, most notably, the small-duct market.

Unico, Inc. is the leader in Small-Duct / High Velocity (SDHV) heating and cooling systems.

## About Filters

In a continuing effort to meet the needs of home and business owners in the areas of air purification and air filtration in Small-Duct High-Velocity HVAC systems, Unico has added MERV13 and EU filters to our line up of air filtration products.

In a recently released study, "The World Health Organization recommended the use of airborne precautions whenever applicable in addition to standard, contact and droplet precautions. ASHRAE's Epidemic Task Force recently issued COVID-19 position statements, which indicate that transmission of SARS-CoV-2 through air is sufficiently likely that airborne exposure to the virus should be controlled."

Unico is bringing to market 13 new 1-inch deep MERV13 and EU rated products to support each market.

The new Unico filters cover the spectrum of the most popular system sizes used by home and businesses in the Small-Duct High-Velocity HVAC marketplace.

The MERV13 rated products have a pleated design and are comprised of a 100% synthetic material designed to capture the current SARS-CoV-2 viruses.
